ENO Action 9 For Forests

is a guideline for ENO Schools about the most important actions for forests, based on sustainable development.

These nine actions were chosen by schools in the Act Now Conference 2011 in Joensuu, Finland. Schools aim to plant 100 million trees by 2017.

ENO Action 9 For Forests:

- > Prosperity
- > The Earth's Ecosystem
- > People

Forests And Prosperity

- 1) We must ensure that forest felling is smaller than forest growth.
- 2) We must plant trees so that there is enough wood for people in the future.
- 3) We must have sanctions against illegal forest harvesting in every country.

Forests And The Earth's Ecosystem

- 4) We must save forests because they are needed to balance global climate changes.
- 5) We must not destroy the habitats of different species.
- 6) We must save forests by planting tree species of local origin.

Forests And People

7) We must save forests as a place to live (they are homes for 300 million people).

8) We must increase the use of forests as nature's own source of nutrition (berries, mushrooms, herbs, spices, etc.)

9) We must develop forests as places for relaxation and revitalisation (hiking, fishing etc.)

100 Million Trees
by 2017.

Schools can make it.
It's up to you.
